KEARNEY'S RING WILL GO TO SWEETHEART

"Accidental Drowning" Is Given As Cause of Death of Aviator and Chester Lawrence, His Companion.

Los Angeles, Calif., Dec. 30.—"Accidental drowning" was given in the coroner's certificate as the cause of the death of Horace Kearney and Chester Lawrence, who six days ago started on a hydroplane flight and who flew only a few miles before the craft met disaster. Both bodies were recovered near Redondo beach.

Ten hours after the body of the young reporter, battered almost beyond recognition by waves and rocks, was found on the precipitous coast near Rocky Point, that of the aviator-companion was picked up a mile away at sea.

SUPPOSED MURDERER IS IMPRISONED AT HAYDEN

Hayden, Ariz., Dec. 30.—A Mexican, thought to be the much sought murderer, Margarito Martinez, was arrested by deputy Barton, of Kelvin, and taken to Ray and brought from there and lodged in the local jail by deputy Gibson. Martinez killed another Mexican a few nights ago in a saloon in Globe and since that time has been running free in the Pinal mountains, between Globe and Hayden. The prisoner claims that he is not the man, but will be kept pending the arrival of the sheriff.

Faith and Gerns.

The firm belief of the people in the very existence of the disease germ is a touching instance of the power of faith. Which of us has seen the germ of tuberculosis at any time? Certain holy men in our laboratories declare that they have seen it through the eye of the microscope, as holy men of old reported their visions of devils and of angels. We accept the reports of our seers as did our fathers in the so-called Age of Faith. Woe to us if through skepticism or callous indifference we neglect the ceremonial purifications which they have established. If my house has been possessed by the foul devils of scarlet fever, it is at peril of active persecution by the law that I fall to burn my sulphur incense. By force of public opinion, and by law as well, I should be compelled, did not my abounding faith lead me of my own accord to purchase indulgence against the purgatorial pains of the smallpox through the rite of vaccination. The penance imposed is but the discomfort of a sore arm and some pence paid to the ministrant—Robert Kilburn Root in the Atlantic.

Nature's Hints to Inventors.

The view has been advanced in more than one quarter that during the next two or three centuries invention will probably be in the direction of imitating the wonderful economy and the simple, direct methods of nature. An instance in point is the electric eel. Its electric organ is in no sense a storage battery, but a contrivance by which electric energy is liberated at the moment when it is required. At rest the organ shows so small an electric force that a good galvanometer is needed to detect it, but a sudden nervous impulse from the eel's spinal cord raises a potential of many volts with very little heat and so small an expenditure of matter as to defy the most expert chemist to weigh it. Fireless, glow-worms, and many deep-sea fishes produce light without heat at a cost which would make a match an extravagant outlay.—Harper's Weekly.

The ordinary cost of a Want Ad. in The El Paso Herald is 25 cents. It reaches an average of about 70,000 readers each issue.

GERMAN AVIATOR IS SEIZED BY TROOPS ON FRENCH SOIL

Vesoul, France, Dec. 20.—The German aviator who landed at Marmay in his biplane yesterday and whose machine was seized by the French police, has proved to be a German noncommissioned officer named Zeiffer. He was dressed in the uniform of the German military flying corps. He declared today that he had undertaken to follow the course of the canal from Mulhouse to fortress of Strassburg, but had lost his way.

The French military governor has sent a detachment of the flying corps to assist Zeiffer in the resumption of his flight.

HOLIDAY TRAVEL IS VERY HEAVY THESE DAYS.

Although the sunset express leaving El Paso for the west Friday had two engines pulling it, services of the switch engine were required to push the train out of the yards, after it narrowly missed spilling a switch. There were 11 cars on the train and two of them were loaded to the guards with express and baggage.

The Golden State Limited arrived on time from the west, but was held up more than half an hour for loading the mail and express matter was so heavy.

Nearly 500 Mexicans, bound for Mexico to spend the Christmas holidays, arrived on the Santa Fe Friday morning.

W. G. Van Vleet, general manager of the G. H. & S. A., who has been in El Paso for a short time, returned to his headquarters at Houston Friday morning.

QUITS FLYING GAME AND HAS SOME MONOPOLIES LEFT

Fly while the flying is good. Then quit. This is the sage advice of Earl Remington, ex-aviator and still living, who is at the Paso Del Norte. Remington was one of the best of the flyers and won a number of prizes for his exhibition flights.

Mr. Remington is now engaged in the staid and matter of fact business of drawing plans for business buildings in Los Angeles. He has a stable of six monopolies in Los Angeles that are for sale he says to the lowest bidder, and a second hand suit of leather flying clothes for which he has no further use.

FIND CHINESE ON ROOF

Two Chinese were snugly stowed away on the roof of a Texas & Pacific chair car attached to the east bound train Thursday evening when they were discovered by immigration inspector W. H. Robb. The Chinese had evidently been placed in the roof of the car in the railroad yards and the immigration authorities believe that another Chinese smuggling trust has been organized.
